

**ESTONIAN AGRICULTURAL RESEARCH CENTRE
VILJANDI VARIETY TESTING CENTRE**

Reference number of reporting authority: 10-1/83 'BRIGENA'

15. Characteristics Included in the national TG 6.10.2008 KJ/2/1

National No	Chracteristics	States of Expression	Note	Remarks
1.	Plant: growth habit (in autumn of year of sowing before the end of growing)	meedium to semi-prostrate	6	
2.	Plant: tendency to form inflorescenses (in year of sowing before the end of growing)	absent or very weak	1	
3.	Plant: time of inflorescene emergence (at the end of growing period, on 2. growing year in summer)	medium	5	
4.	Leaf: intensity of green colour (at the end of 2. growing season in summer)	medium	5	
5.	Leaf: recurved (when is fully developed)	recurved	3	
6.	Leaf: the green bloom on leaf (when is fully developed)	present	9	
7.	Flag leaf: lenght of longest stem	long	7	
8.	Flag leaf: width of longest stem	broad to very broad	8	
9.	Next leaf to flag leaf: lenght of longest stem	very long	9	
10.	Next leaf to flag leaf: width of longest stem	medium	5	
11.	Stem: lenght of longest stem with inflorescene (fully developed)	long	7	
12.	Flag leaf: width of longest stem	long	7	
13.	Inflorescence: lenght (when stem is fully developed)	long	7	
14.	Inflorescene: anthocyanin coloration (when inflorescene is fully developed)	medium	5	
15.	Rhizomes: lenght (when inflorescene is fully developed)	medium	5	
16.	Rhizomes: abundance of presence (when inflorescene is fully developed)	medium	5	
17.	Plant: tendency to form inflorescences (on 2. growing year after mowing)	absent or very weak	1
