	1.7 Country, issued certificate:
	1.8 Competent authority of the export country:
	1.9 Organisation in the of the export country issuing this certificate:
1.4 Country of transit:	1.10 Point of crossing the border of the European Union:
2. Identification of goods 2.1 Name of the goods: 2.2 Date of production of the goods: 2.3 Type of package: 2.4 Number of packages: 2.5 Net weight (kg): 2.6 Number of seal: 2.7 Batch number: 2.8 Conditions of storage and transport:	
3. Origin of the goodis 3.1 Name, registration number and address of the company: 3.2 Administrative-territorial unit:	

4. Certificate on suitability of the the fodder fish meal

I, the undersigned State/official veterinarian certify that:

4.1 Fodder fish meal produced from fish, sea mammals, crustaceans and invertebrate exported to Bosnia and Herzegovina made at their processing and is intended for production of fodder and for feeding agricultural animals, birds and furs and is shipped from enterprises, which are located on territories safe animals on infection diseases and is conformed to the following veterinary-sanitary requirements.

The manufacturing establishment test samples of the finished goods are currently being subjected to examination and that these test samples are found to comply with the following standards: ☒

Salmonella: absence in 25 g, n = 5, c = 0, m = 0, M = 0

Enterobacteriaceae: n = 5, c = 2, m = 10, M = 3×10^2 in 1 g

4.2 The product has been subjected to thermal processing not below +80 degrees of Celsius within 30 minutes.

4.3 The material for packing is disposable and meets the requirements of Bosnia and Herzegovina

4.4 The transport is treated and prepared in accordance with the regulation as approved by exporting country.

*

n = number of unit comprising the sample;

m = threshold value for the number of bacteria; the result is satisfactory if the number of bacteria in all sample units does not exceed m;

M = maximum value for the number of bacteria; the result is considered unsatisfactory of the number of bacteria in one or more sample units is M or more;

c = number of sample units the bacterial count of which may be between m and M, the sample still being considered acceptable if the bacterial count of the other sample units is m or less.
